

std::true_type

```
graph BT; A[is_prvalue< T >] --> B[std::true_type]
```

The diagram illustrates a relationship between two C++ types. At the bottom is a gray rectangular box containing the text `is_prvalue< T >`. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box contains the text `std::true_type`. This visualizes `std::true_type` as a specialization or inheritance of `is_prvalue< T >`.

is_prvalue< T >
