

std::false_type

```
graph BT; A[is_xvalue< T >] --> B[std::false_type];
```

A diagram illustrating a relationship between two C++ types. At the bottom is a gray rectangular box containing the text `is_xvalue< T >`. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box contains the text `std::false_type`. This represents that `is_xvalue< T >` inherits from or is a specialization of `std::false_type`.

is_xvalue< T >
